EXPERIENCE

CQL Corp
Senior Interface Developer, Team Lead

AUGUST 2018 - PRESENT

As **Senior Interface Developer**, architects frontend frameworks and component libraries with easily customizable themes, both from scratch and extending existing frameworks. Focuses on web accessibility and manageability of the codebase, while mentoring junior devs on best practices.

As **Tech Lead**, works closely with clients to review and create requirements, estimate projects, write documentation, create acceptance criteria, assign work to developers, and lead code reviews.

As **Team Lead**, manages a team of remote interface developers, which includes bi-weekly one-on-ones, setting yearly goals, tracking career progression, and working together to find training courses, certifications, and conferences.

CQL Corp
Front End Developer

OCTOBER 2015 - AUGUST 2018

Built new and supported existing sites for multiple clients on Demandware (SFCC). Updated style framework to be modular, scalable, and content-editor friendly, with a living style guide including plug-and-play code snippets.

TEKsystems
Front End Developer

JUNE 2015 - OCTOBER 2015

Contract-to-hire position with CQL Corp. Joined the Enterprise E-commerce Team. Supported, maintained, and optimized a legacy codebase for 15 brands spread across multiple locales on the Demandware platform.

AVI-SPL
Front End Developer

FEBRUARY 2013 - JUNE 2015

Created custom websites and online javascript calculators for companies under the Dow Chemical umbrella. Built the new front-end framework for moving sites from an older Teamsite implementation to a unified Sitecore set of templates and themes.

AVI-SPL
Web Technician

MAY 2012 - FEBRUARY 2013

Created new websites within the existing template structure of a CMS, and updated existing sites. Worked primarily with HTML and CSS, with a few basic sliders and finders built in JavaScript.
